THE WORLDWIDE TV-FM DX ASSOCIATION

Serving the UHF-VHF Enthusiast

THE WHE DIFF DIGEST IS THE OFFICIAL PUBLICATION OF THE WORLDWIDE TV-FM DX ASSOCIATION DEDICATED TO THE OBSERVATION AND STUDY OF THE PROPAGATION OF LONG DISTANCE TELEVISION AND FM BROADCASTING SIGNALS AT VHF AND UHF. WTFDA IS GOVERNED BY A BOARD OF DIRECTORS: 1 DOUG SMITH, GREG CONIGLIO, BRUCE HALL, KEITH McGINNIS AND MIKE BUGAJ.

Treasurer: Keith McGinnis wtfda.org Webmaster: Tim McVey

wtfda.info Site Administrator: Chris Cervantez

Editorial Staff: Dave Williams, Jeff Kruszka, Keith McGinnis,

Fred Nordquist, Nick Langan, Doug Smith, Peter Baskind and John Zondlo,

Our website: www.wtfda.org; Our forums: www.wtfda.info

OCTOBER 2007

Finally! For those of you online with an email address, we now offer a quick, convenient and secure way to join or renew your membership in the WTFDA from our page at:

http://fmdx.usclargo.com/join.html

Dues are \$25 if paid to our Paypal account. But of course you can always renew by check or money order for the usual price of just \$24. Either way, it's still a bargain!

eVUD members please send \$10 for membership or renewal to mbugaj@snet.net.

DX WINDS DOWN

Welcome to October! The Es season is long gone and much of the tropo season is almost over for most of us.

Early September found tropo in the Northeast USA from the 2nd to the 3rd (ON to NJ and parts of New England) and then again from the 5th to the 6th (paths from coastal New England to NC) and then from the 8th to the 9th from MA down to Virginia. The 11th found tropo in the Ozarks. E skip was noted on the 3rd and the 8th of September on ch2 and 3 from the midwest to the East Coast. And Saul Chernos caught some MS bursts during the period also.

CONVENTION 2007 IS OVER

And a great time was had by all. The WTFDA board agreed that we should do this again sometime but probably at a more easterly location where more WTFDA members could attend. A big thank you goes out to the Frank Aden and the NRC Board of Directors.

Here is a photo taken at KBOI. This is probably as close to a group picture that we'll find. You can go to our website at http://www.wtfda.org for a link to a much larger picture and other photos.

MEMBERS AND MORE

This month we welcome one new member and that's **Tommy Adair**. Tom lives in Columbia, TN and is discovering the wonderful (and sometimes frustrating) world of digital television DXing. He's been the cause of some good DTV discussion at the

Forum site (http://www.wtfda.info).

Also we welcome back **John Lochey** into the group. We're glad you're back!

With WTFDA member **William Hein**'s move to Long Island we no longer have a member in the state of Vermont. Well at least William won't have any problem watching any OTA television there.

We've got renewals and these cover the period from 8/20 to 9/17: Michael Temme-Soifer (NJ), Wolfgang Schneiter (CA), Jeff Lehmann (MA), Al Putman (ON), John Lentz (WI), FJ Issard (ON), Glen Hauser (OK), Roosevelt Crawford (KS), William Hein (NY), Chris Kadlec (NY), Bill Smith (MA), Melvin Dishong (GA), George Greene (OH), Joe Fela (NJ), and Mike Bugaj (CT).

Thank you all for staying with us as we continue in this wondrous journey to digital television.

Bill Smith sends in one of his QSL cards this month. Thanks, Bill!

FM TRANSLATOR INTERFERENCE

Bob Seaman sends in this interesting report:

At the end of June I had experienced a local translator W248AK come on the air and obliterated a 40dB signal on 97.5. I knew that this shouldn't have been happening, but I wasn't quite sure how to alleviate the interference. I had the name of the Chief Engineer at the station that was being covered by the translator and an e-mail address. I also contacted Scott Fybush to see if he knew of an e-mail address at the FCC where I could send a message about my displeasure with the new translator.

Scott suggested I contact the FCC by phone and the Chief Engineer of the affected Scott said that the translator regulations state that TRANSLATORS CAN NOT INTERFERE WITH THE "REGULAR" OF **RECEPTION** ANY **STATION OPERATING** ΑT THE **FULL** AUTHORIZED POWER, EVEN OUTSIDE THE PROTECTED CONTOURS OF THAT STATION. I sent an e-mail to the station and called the FCC. The FCC told me that they did not get involved directly with the public and that I should contact the station which was being affected by the translator.

If anyone has a local translator which interferes with another station, the translator can be made to eliminate the interference. The local translator on 97.5 was shut down on August 15th restoring reception of WJJZ Burlington, NJ/Philadelphia which had moved to the new transmitter site just north of Philadelphia, the signal strength is now 45dB at my location.

A check of the engineering information on file for the translator shows that they do an Interference Study Overlap Requirements of co-channel and 1st and 2nd adjacents. The study is done with the translator as a Class A station, but the interference is only done at the 54dB signal of Class B stations and the 60dB signal of Class A stations. This information totally ignores the fact that THE TRANSLATOR WILL STILL INTERFERE WITH THE OTHER STATIONS.

The same translator is now looking for another frequency and they have chosen 96.9 and there is a local Class A on 97.1 WBHT which is going to be affected by the new frequency. The new Interference Study has the 60dB signals of the translator and WBHT butting up to each other, but not overlapping. Apparently the FCC only looks for overlapping, but there still will be interference.

So the final word is if you have a translator interfering with a full power station, contact the full power station. They usually are willing to eliminate the interference to their signal. They need 6 or 7 letters of complaint from listeners in the affected area to initiate the proceedings. In my area, I have found that most translators are interfering with another stations due to the crowded band conditions which already exist. One other local translator has applied to move to 91.1 from 91.5 and there is an existing station on 91.1 WRTY which is putting in a signal of 52-54 dB into the area being served by the translator. This translator will never be able to exist on 91.1.

If anyone needs any additional information on this contact me directly.

seaman_robert@myrealbox.com

ODDS 'N ENDS

If you look at page two you'll see something different this month. What you'll see is that our webmaster Tim McVey has set up most of us with our very own wtfda.org email addresses. The Mailbox has it's own address as does Northern FM DX and Eastern TV DX and Western TV DX (which does not appear this month due to lack of material to fill a page).

We have more than enough email addresses remaining to assign to every WTFDA member if we wanted to. But we won't do that. What we will do is ask you to email us if you want one. Tell us what address you would want (superdx@wtfda.org, for example) and tell us what email address you want email for superdx redirected into. Right now we don't have webmail set up at wtfda.org to send email from there, but an incoming wtfda.org email address will work just fine, plus it will confound and impress your friends, family and co-workers.

I now have access to a portion of the wtfda.org website and I've made some changes and added some material. If you would like to add some material to wtfda.org, send it in an email (or Word document along with a graphic or two...or even Wordperfect if you use it) and I will get it posted there. We could use original equipment reviews, for example, but your imagination is the limit. If you like to write about your hobby, this is a great place to get your original material published!

FINAL 2007 ESKIP POLL RESULTS

We asked you to give a final grade to the 2007 E skip season and you did.

This graph appears at the polling area of wtfda.info. Eighteen votes were placed. Two people gave the season an A, eleven gave a B, four gave a C and one gave a D. All in all, it wasn't too bad this year. Go there and read the complete thread. Or post *your* grade!

LAST BUT NOT LEASED

We are holding our own with a membership hovering in the upper 240s by the end of the month. Our Forums are popular with many people and it seems some prefer them to the email mailing lists we offer. The WTFDA is a vibrant club of enthusiastic DXers and it's YOU who keep it that way. See you next month!

50

Thanks to Jeff Kitsko, John Lentz, Steve Rich, and Robert Grant for information elsewhere in this month's column.

Robert Grant brought my attention to a NTIA (National Telecommunications and Information Administration) program for upgrading LPTV and translator stations to handle the DTV transition.

The Deficit Reduction Act of 2005 has three relevant provisions:

- Analog LPTV and translators are permitted past the February 17, 2009 deadline for the shutdown of full-power analog stations.

- \$10,000,000 has been appropriated for digital-to-analog converters at the input of TV translators, beginning October 1st.

This money is for translators to switch from relaying analog full-power stations to relaying their associated full-power DTV signals. Up to \$1,000 is available for each translator. Both commercial and non-commercial stations are eligible, but the station must be on the air as of the date the grant request is filed.

The output signals of these translators will continue to be analog.

- \$65,000,000 has been appropriated for upgrading the output signals of LPTV and translator stations to digital. Only stations in towns of less than 20,000 population are eligible for this money.

Priority for grants in both programs goes to stations that serve rural areas with fewer than 10,000 viewers.

John Lentz reports WVCY-30 Milwaukee off for over a week due to a dead Klystron tube in their transmitter. Tim Cuprisin of the Milwaukee Journal-Sentinel reported the replacement tube had to be shipped from England.

John also wrote that as a result, WVCY-DT is also off the air. When I first read John's email I figured it had to be a misunderstanding. There was no way that a tube failure in the analog transmitter could force the digital station off the air. But after reading the rest of the email, I realized why the digital was off:

"Reason is because the DTV transmitter relies on getting a signal from the analog transmitter and it will rebroadcast programs off the analog transmitter."

I've never heard of a DTV station doing that before! Essentially, WVCY-DT is a giant 200-kilowatt digital translator of the channel 30 analog signal.

I do note that the WVCY analog and DTV transmitters are at different sites; presumably they didn't want to spend the money on a second microwave studiotransmitter link. (STL) I suppose they figure when the analog is shut down in 2009, they simply remove the STL receiver from the analog transmitter site and move it to the digital site.

Good DX!

Eastern U.S. TV DX

Featuring reports from AL, CT, DC, DE, FL, GA, IN, KY, MA, MD, ME, MI, NC, NH, NJ, NY, OH, PA, RI, SC, TN, VA, VT, and WV, along with the Canadian Provinces of NB, NF, NS, ON, PEI, and PQ.

Send reports by the 15th of each month to: Nick Langan 1040 Riverview Drive

Florence, NJ 08518 E-mail: nickl@wtfda.org

The Editor's Note

September was a fun month for tropo for DXers in the northern half of the east, while not much was to be found toward the south. Expect conditions to reverse themselves as the cold air of Autumn starts to filter its way down from Canada. Still, October figures to offer tropo opportunities for most, so stay near the dials!

Robert Grant (N8NU) 231 E Temperance Rd. Temperance, MI 48182

E-mail: <u>Rg3d@yahoo.com</u> (expect delays, no home Internet access)

Temperance is in SE corner of MI. (EN81fs) Receiver: Sylvania (Funai) 6427GFF 27" color analog/digital SDTV.

Says Robert: "Es made a pretty good finale on 8/12. The channel 2 at 1350 EDT is unique. It seems to show up every time Es works to Maritime Canada. It had been noticed several times last summer, and at least once earlier this summer, but has never been strong enough to break through WJBK.

The video carrier of this one seems to be a plus offset - but varies SEVERLY. I would not be surprised if this transmitter is modulating the video carrier frequency with the audio content, then using a dead carrier in place of the audio transmitter. On virtually any TV set, this would still result in audio being heard!

Just after the Canadian stations faded out, the opening was reborn in the Southwest. WWL was very strong, free of multipath and quite steady for nearly a whole hour. I wish that they had been transmitting as a DTV on channel 4, I'm sure I would have had a lot of good HD video and audio from this opening if that were the case.

The August Tr season, like this summer's Es season, offered a decent amount of DX time, but none of it great."

Jim Pizzi 100 County Road 28 Palmyra, NY 14522

Says Jim: "Well, the 13th was the last day of the ES till hopefully late Novemberearly December, maybe January too! I'll be keeping an extra watchful eye open. Trops has been so-so here...no enhancements beyond 150 mi. in quite a while. I hope others are doing better as I enjoy reading reports in the VUD. Good DX to all. Jim.'

Bill Grant - Worcester MA

I noticed at 11pm on Tuesday (18th) that CJMO 103.1 Moncton was coming in. I was dead tired from looking at late night football and baseball all week, so I went to bed with the idea of getting up early. However, it was nearly 8am when I turned the radio on again. There on 103.1 was CBH-2 in Mulgrave (parallel to 102.7). I spent the rest of the day and evening listening to stations in NB, NS and downeast Maine. CBH-2 and105.9 in Dennysville were still in there after midnight Thursday morning (20th) but were gone by 7am when I checked again.

Here is a rundown of what I heard (* new stations).

Halifax, NS

CBAX 91.5, *CKUL 96.5 (RDS: KOOL-FM), CBH 102.7, CKHZ 103.5, *CFRQ 104.3

(RDS: Q104-FM) Mulgrave, NS *CBH-2 103.1 Truro, NS *CKTO 100.9

Moncton, NB

*CJXL 96.9, CJMO 103.1 (RDS: C103FM)

Fredericton/St. John, NB

CHWV 97.3, CIOK 100.5, CBZ 101.5, CBAF-1 102.3, *CFXY 105.3

Maine, USA

*WMME 92.3 Augusta, *WEZQ 92.9 Bangor, *WALZ 95.3 Machias, *WABI 95.7

Ellsworth, *WNSX 97.7 Winter Harbor, *WFZX 101.7 Searsport, WQSS 102.5

More ()

CKTO Truro, NS

Camden, WCRQ 102.9 Dennysville, WVOM 103.9 Howland, WBQI 107.7 Bar Harbor

Antenna was in the attic (heading 40 degrees). Strong area stations and their IBOC hash made other frequencies (i.e. Sydney) impossible. I'll be looking for a few good fall openings.
